We had a very good turn out with 15 members present. Also a good weekend was had by one and all only spoilt by fresh to strong wind with a scattering of showers. These conditions were not for the faint hearted as most of the scores do not reflect the difficulty. As I was informed by one good shooter "I had 17 minutes of wind on at one stage. Wound back to 11 minutes in order to stay on target then a shot or two, later found myself back on 17 minutes"
